

I am an over-the-road truck driver and have been for over 40 years, and this is one of the best things that has come along in a long time. Even though we have to pay for it, I would like to see MORE cities added to the traffic and weather because traveling to these cities it is nice to be able to tune in in advance and get the information. It has a lot to do in whether you bypass or go forward. The uninterrupted programs are great company when you are out there by yourself and help to pass the hours. I hereby ask that the FCC reject the NAB's petition 04-160 and support xm's ability to provide the kind of programming that we enjoy.
